outdoor

Step into a space designed just for you.

Designed for the home.
Built for the way you live.

bespoke
adj. 'made to individual
order; custom made'

At Bespoke Outdoor, we create custom outdoor spaces shaped around your home and the way you live. Every detail is thoughtfully planned and beautifully executed, creating a space that feels considered, cohesive and entirely your own.

We manage the complete design and build process, bringing great design, quality craftsmanship and everyday function together.

The result? An outdoor space that enhances your home and the way you live.

Because a space that reflects you is the only kind worth building.

Let us guide you through the process of creating a bespoke outdoor space that is uniquely yours and perfectly suited for you and your family.

OUR STORY

Built from experience.

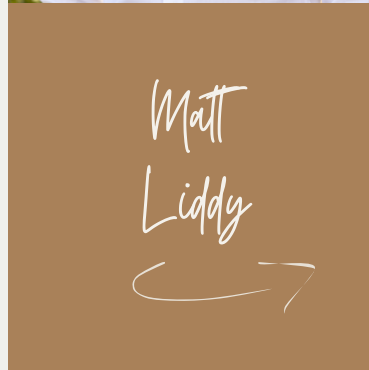

Founded by long-time friends and qualified carpenter/builders Matt Liddy and Wade Bamber, Bespoke Outdoor is backed by more than 20 years of building experience and over 15 years specialising in opening roof systems.

After years in the industry, Matt and Wade saw an opportunity to do outdoor building differently - with better service, stronger construction knowledge and more care in how every part of the project comes together.

Today, they are supported by a skilled team on-site and behind the scenes, all working to the same standard of quality, communication and attention to detail.

Outdoor spaces. Built around you.

We design and build custom outdoor areas, with the experience to manage more of the project under one team. From opening roofs and pergolas to decking and surrounding works, Bespoke can take care of it all.

01 OPENING ROOFS

Adjustable roof systems that give you greater control over sun, shade, airflow and shelter.

02 VERANDAHS + PERGOLAS + POOL PAVILIONS

Custom-designed structures made to suit your home, property and outdoor area.

03 DECKING + SURROUNDING WORKS + HARDSCAPES

Decking, screening, structural works and the finishing details that bring the outdoor space together.

04 COMPLETE OUTDOOR SPACES

For bigger transformations, we can manage the entire design and build from start to finish.

DESIGN + BUILD

From first ideas to finished space.

We can manage the process from design and planning through to construction and finishing touches. That means fewer handovers, clearer communication and a team that understands the whole project.

A clear path from idea to build.

01

TALK

We start with your home, your outdoor space and how you'd like to use it.

02

DESIGN

We design around your property, rather than trying to make a standard solution fit.

03

PLAN

We take care of the details, approvals and planning needed before construction begins.

04

BUILD

Our team manages the build, keeps things moving and keeps you informed along the way.

05

ENJOY

Once everything's finished, it's over to you. And if you need us afterwards, we're still here.

ECLIPSE SHADE SYSTEMS

Opening roof expertise, built in.

For projects that include an opening roof, louvre or shade system, Bespoke works closely with Eclipse Shade Systems.

It means the roof system can be planned alongside the broader build from the beginning, helping the structure, services and finishes work together as one project.

Eclipse systems can include motorised operation, automation and weather-sensing options, depending on the selected system.

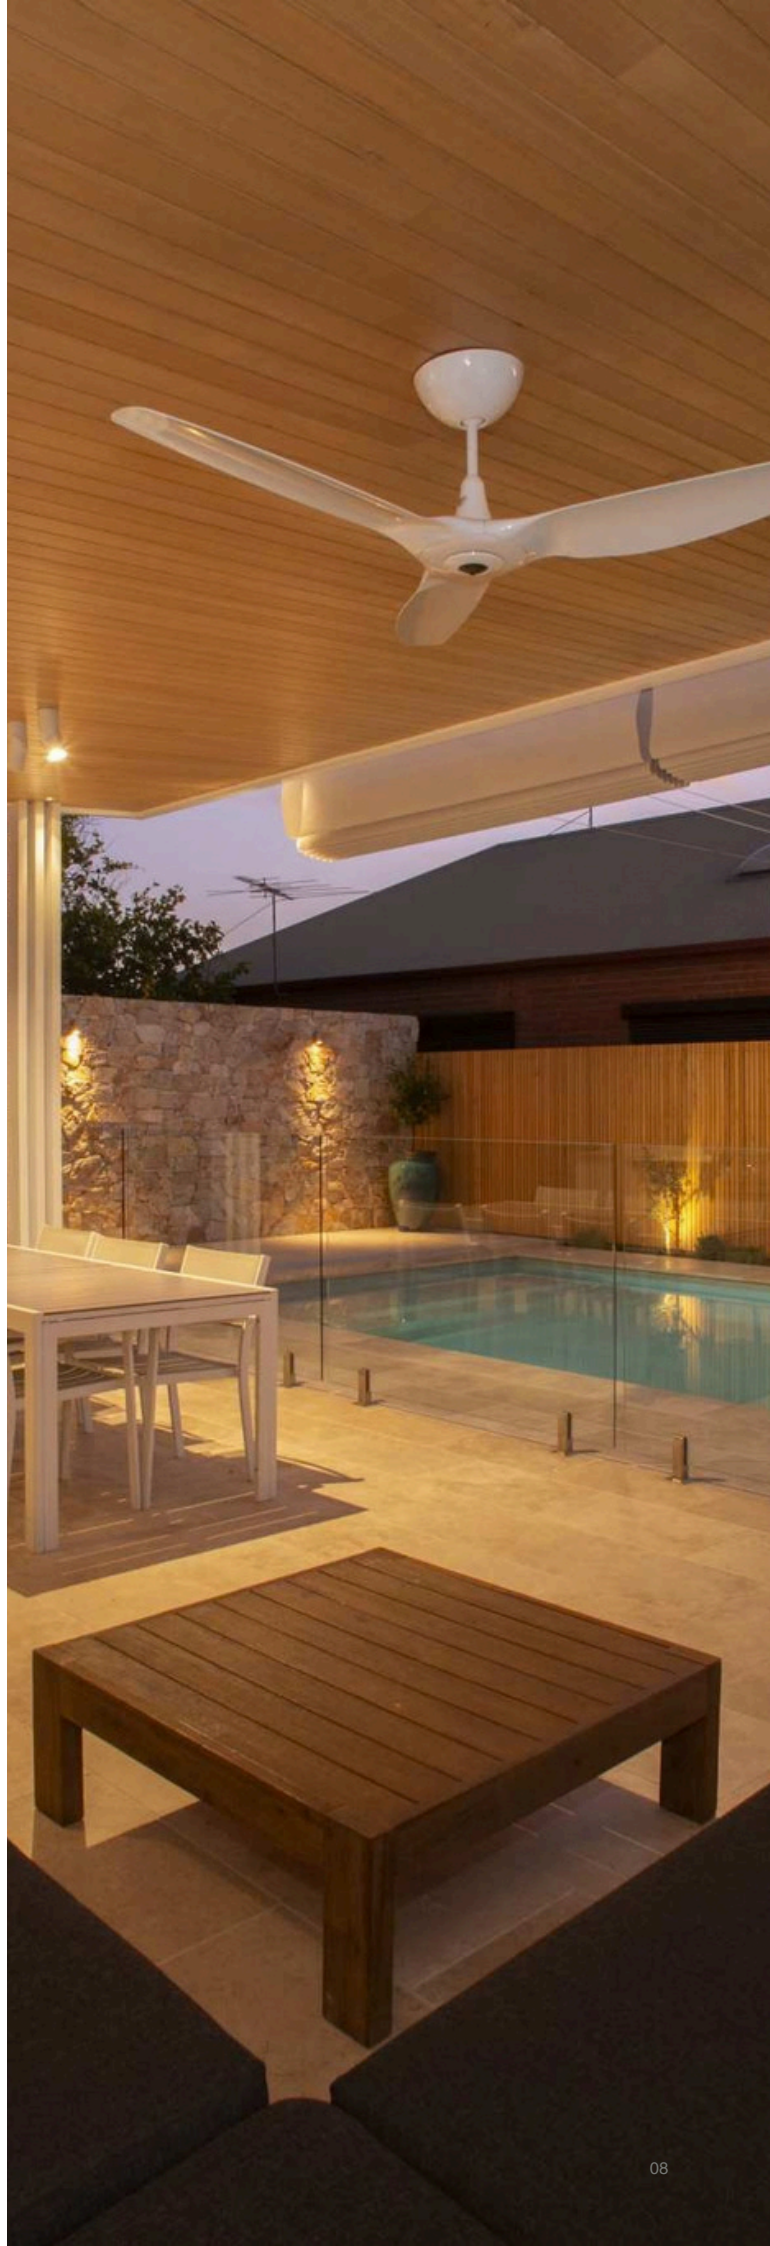

Good design matters. So does good building.

*We believe the best outdoor spaces
come from getting both right.*

We are not interested in simply adding a structure to the back of a house.

We think about how the space connects to the home, how it will function day to day and how the materials, structure and finishes come together.

The aim is an outdoor space that feels like it belongs there - and is built properly enough to keep doing its job for years to come.

OUR PEOPLE

Experience you can trust.

Matt and Wade lead a team of qualified and licensed builders, installers, carpenters and project managers who understand that the experience matters just as much as the finished space.

You will deal with people who know your project, understand what needs to happen next and stay across the details from the first conversation through to completion.

OUR PROJECTS

Real homes. Real outdoor living.

Our work ranges from opening roof projects to complete outdoor spaces, including all fixed roof types and pool pavilions, with each one designed around the property and the people who live there.

The people who know us best.

“

I can't recommend the team at Bespoke Outdoor any more highly. Wade and Matt provide speed, quality, attention to detail and come up with perfect solutions for a project like ours.

CRAIG H.

“

We are extremely happy with the finished product and the professionalism and communication of all of the staff at Bespoke Outdoor / Eclipse Shade Systems. The system looks fantastic and has really enhanced our outdoor living space.

MIKE H.

“

The whole process from obtaining a quote, gaining council approval, actual construction, the need to make adjustments and ease of making payments, all led to the 5* rating. We appreciated the professionalism of Wade, Sallie, April, Matt and particularly, Nico and his crew. There were some unexpected circumstances encountered in the construction, but these were clearly explained to us and solutions provided. The outcome was a quality construction project that mirrored our previous experience from using Bespoke Outdoor on a louvered roof pergola.

JOHN P.

“

Excellent customer service throughout the whole process. We're so happy with the quality of our new louvre pergola and 100% recommend. From the moment I spoke to Sallie on the phone she went above and beyond. The boys did an amazing job building and making sure that we was happy with the standard and size throughout the build. Very happy customer

AMANDA F.

LET'S CHAT.

Let's create a space you'll actually use.

Planning a new outdoor area, upgrading an existing one or still working out what is possible?
Tell us what you have in mind and we will talk you through the next step.
